NETWORKWALKS

LETTER OF AUTHORIZATION FOR CYBERSECURITY TESTING

Reference No.	NW-LOA-B082-017
Date of issue	09 November 2026
Client / Target owner	Networkwalks
Authorized tester (Intern)	Lamidi Eleshin
Program / Batch	B084 - Networkwalks Cybersecurity Internship
Authorization valid	09 November 2026 to 18 November 2026

To Whom It May Concern,

This letter serves as formal confirmation that Networkwalks grants permission to the authorized intern identified above to conduct limited, controlled, and non-destructive cybersecurity testing on the approved systems outlined in this document.

This authorization is provided strictly for educational and practical training purposes under the Networkwalks Cybersecurity Internship Program. All testing must remain within the approved scope and specified authorization period.

1. Scope of Authorization

The authorized tester is permitted to conduct basic reconnaissance, information gathering, and network scanning activities on the following targets only:

- networkwalks.com: The official Networkwalks website and its associated DNS records.
- Personal Local Area Network (LAN): The tester's own network and devices under their direct ownership and control.

Any website, server, IP address, network, or system not specifically identified above is excluded from this authorization.

2. Authorized Cybersecurity Activities

The following activities are permitted as part of the reconnaissance and scanning phases of the cybersecurity internship:

- Conduct passive reconnaissance and gather publicly available information using tools such as Whois, WhatWeb, Nslookup, Curl, WAFW00F, and DNSRecon.
- Perform basic network discovery and scanning using Nmap or Zenmap on the tester's personally owned network.
- Identify active devices and review publicly available network information without disrupting services.

All activities must be performed responsibly and strictly within the approved scope.

3. Prohibited Activities

To maintain ethical cybersecurity practices and protect the integrity of systems, the following activities are strictly prohibited:

- Attempting unauthorized access, exploitation, or privilege escalation.
- Performing denial-of-service attacks, password cracking, brute-force attacks, or other disruptive activities.
- Accessing, copying, modifying, or deleting confidential information belonging to Networkwalks or any third party.
- Conducting social engineering against Networkwalks employees or other individuals.
- Testing any system, network, or application outside the approved authorization scope.

4. Terms and Conditions

The authorized tester agrees to comply with the following conditions:

- Immediately discontinue testing whenever instructed by Networkwalks or when an unexpected service disruption occurs.
- Maintain strict confidentiality regarding all information, observations, and findings obtained during testing.
- Use the information collected exclusively for the approved internship activities.
- Conduct all testing ethically, professionally, and in accordance with applicable laws.
- Accept responsibility for activities performed outside the approved authorization.
- Understand that this authorization automatically expires on the specified end date unless formally renewed in writing.

5. Acknowledgement and Agreement

By signing this document, Networkwalks confirms its ownership or control of the approved testing targets and formally authorizes the cybersecurity activities described above.

The authorized tester also acknowledges that they have carefully reviewed and understood the scope, limitations, and conditions of this authorization and agree to comply with them throughout the internship.
